In the mean time he dank freely of an herb tea of laxative qualities. He soon found his health improving, and in a few weeks his cough left him; the sallowness at his skin disappeared, his pain was removed, and his health became permanently reinstated. I had worn a plaster upon my breast but a short time, when all pain ich me, and I was enabled again to engage in the labors of the office. I would also state, that my sister, residing in Steubenville in this State, has received much benefit from its use. Yours, truly, JOHN P WORSTELL." Massillon, November 12, 1845.

The Ladies are always charitable, and when they induce their suffering friends to use this really valuable medicine, they will be doing an act of benevolence that they can well be proud of This is a powerful and truly magical remedy for all external discauses, sores, swellings, burns, &c., and for many internal afflictions, it is a certain cure, yet it is perfectly harmless, and incapable of producing the least injurious effects in the most delicate cases or the weakest constitution. the weakest constitution.

It is entirely useless to follow the old and worn-out system of publishing to the public thousands of certifi-cates of wonders performed by this medicine. KADWAY'S REGULATORS.—Every pull taker should examine the theory on which the Regulators are founded averyone "who takes pills" will find Kadway's Regula-tors the most pleasant and safe Regulator of the Liver, Bow-els, Kadine's, and other organs of the system in use. We have hitherto been treating of disease or inflamma-tion in its neare or chronec state, and its remedies; the RE-LIEF on one hand and the RESOLVENT on the other. We

now pass to the consideration of that state of the system im-mediately preceding disease or inflammation, viz. Irretation. To many protested of the nervous system, and re-move its effects wherever it exists, and to aid the RELIEF or RESOLVENT in treatment of inflammation, are the chief or RESOLVENT in treatment of inhammation, are the chief purposes of the REGI LATORS.

But how is nervous irritation, the cause of disease? Because the glands of the system a e-convolled by the brain and nervous centers, and whate or irritates the brain causes irregularities of the glands, and when the glands refuse to do their work, the inreign matter which it is their duty to remove, is left in the blood, and increases the already existing irritation. The glands are sewers of the system, and the proposed chiefs of the Liver, the Kidneys, the Pro-

Now, a regular and honest action of these organs are unispectuable to keeping the blood in a pure and majoral state. If we give you poison instead of food lovest, you can easily understand that the blood will be corrupted by it, and discoved action will follow, and it will be just as surely corrupted if the glands do not abstract the worn out materials from it. materials from it.

Again if the kidneys be interfered with in their action, from any irritation whatsoever, whis then we have the salts of the orite the possonous urea circulating in the blood, producing heacherses, come drowsness, &c. And, inst, and most unpertant of all, if any existing causes meeters with the operation of that great laboratory, the laver, behold the disastrous effects!
